- **Mechanical Leak Detection and Testing**
- FXV leak detectors are built for superior performance offering the fastest line leak test available for hourly monitoring.
- Two models are available: FX1V and FX2V. Both provide fast test times, advanced materials, ***increased static head capability***, and reduced nuisance tripping.
- Guaranteed to detect at a rate of 3 gph at 10 psi for 24 months from date of manufacture.
- Operates effectively in areas that experience extreme temperature changes.
- Adapts to applications using high-resiliency lines, such as flexible piping.
- ***Handles up to 11 feet of static head.***
- Installs and troubleshoots easily. No special wrenches or tools.
- Handles a variety of fuels including diesel.
